Career Services assists students, alumni and community members with the career development process. This can include:

- Complete online assessments FOCUS 2 and YouScience to learn more about your interests, values, skills and aptitudes.
- Encourage and connect you to opportunities such as career conversations or job shadow experiences for networking, and to develop/strengthen your "power" skills.
- Assist you with making the transition to the workforce successfully with helping you build your cover letter, resume and helping prep you for the job interview.
